

Minutes of Supervisors of the Checklist May 8th, 2014

Supervisors, Harriet Cady, Tom Dillon, and Gloria Riel met at 6:00 PM. Gloria and Tom finished batching the election of 3/11/2014 on the computer. Harriet updated addresses and made copies of the checklist.

We discussed the Windows XP Operating System Alert. We have to have an upgrade to Windows 7 because ElectionNet will no longer use the XP which now is extremely exposed to outside hackers.

Harriet had asked Steve Jamelle, Board of Selectman, for a refurbished laptop, but he said that he was able to install Windows 7 on the newer notebook pc that the SOC already had. He also said he ordered a refurbished desktop to replace the desktop used in our office. So when Harriet asked about a new laptop, Steve Jamelle said that she would have to discuss it with Micheal and Jan. So she went there and asked about it, and since Steve Barry, BOS was there, he said that all the SOC would need to come to a selectman's meeting to discuss this.

We did discuss this between the three of us, and did all agree that we do need laptops to take to elections for any changes or updates for the voters there, and are willing to discuss this with the selectman.

Gloria moved that we all go to the meeting, Tom seconded and we all agreed to go May 19,2014 to discuss this problem. It is a problem since the state will not let us use the XP after May 30,2014.

We recessed until May 22,2014 at 6 PM
